DEADLINE

Deadline for the next issue of *Today & Tomorrow,* which will cover the period March 29-April 11, will be **Tuesday, Mar. 18, 11 a.m.** Please send your copy to Allen Balderson, News Services Dept., 1475-4th Ave., x2557.

UCSF will award its highest honor - the UCSF Medal - to five eminent members of the UCSF community, in recognition of their distinguished service to the campus and to the field of education and health care, on Wednesday, March 26, at a dinner at the Bohemian Club. Chancellor Sooy will present the awards to Eleanor Crum, Donald Doyle, J. Englebert Dunphy, Otto Guttentag, and Alexander Simon.

Crum, a longtime UC supporter, was an adviser to UC President Sproul during the 1940's. She later became an adviser to Chancellor J.B. deC.M. Saunders and provided support to the campus and students, including a grant-in-aid in 1964 that enabled UCSF to initiate one of the first programs in the country for disadvantaged students.

Doyle, the principal author of the Short-Doyle Mental Health Act, which became a model for the country for support of mental health services, served as a member of the governing board of LPPI and was a founding member of Friends of Langley Porter.

Dunphy, professor emeritus of Surgery, is still active as associate chief of staff for education at the VA Medical Center, S.F. He is one of our most distinguished faculty members.

Guttentag, a pioneer in the field of medical ethics, holds the position of S. Hahnemann Professor Emeritus of Medical Philosophy and Medicine at UCSF. His writings in medical ethics on values are nationally regarded.

Simon is professor emeritus of Psychiatry and served for nearly 20 years as chairman of the Department of Psychiatry and director of LPPI. An innovator in the care of the emotionally disturbed elderly, Simon's work has led to reducing by half the number of elderly people committed to state hospitals.

NEWS BRIEFS

University Service Award certificates will be given to 79 employees during the Annual Chancellor's Award for University Service Ceremony, on Friday, March 28, in Millberry Union Gym at 3:30 p.m. A reception will follow in Millberry Union Lounge.

The Awards, begun in 1954, honor employees who have either been at the University for 25 years or who have retired in 1979.

The 25th Annual Samuel Higby Camp Lectureship has been changed to the 1st Annual Verne T. Inman Lectureship. Dr. Inman, professor emeritus, Orthopaedic Surgery and former chairman, Department, Orthopaedic Surgery, died in February of this year.

Inman was internationally known for his research on human locomotion and the development of prosthetic devices for the amputee.

Ian Macnab, chief, Division of Orthopaedic Surgery, the Wellesley Hospital at Toronto, will present the annual lecture on June 5. Further information on the lecture will be published in future issues of Today & Tomorrow.

The annual Alpha Omega Alpha Lecturer is Helen Ranney, chairman of the Department of Medicine at UC-San Diego. The lecture will be part of Medical Grand Rounds on Wednesday, April 2, in Cole Hall, at 10:30 a.m. The topic will be announced at a later date.

Alpha Omega Alpha is the School of Medicine student honor society. Students are elected into AOA at the end of their third year.

A private gift of stock of $82,730 has been given to the Friends of Langley Porter and will be used for several priority needs of the Institute, including renovation of the shelled space on the third floor research area, which will house the Center for the Study of Neuroses, and a mini-bus to transport patients and staff on community outings. The gift will also provide back-up funds for the renovation of the children's playground, if sufficient funds are not forthcoming from other sources. The donor prefers not to be publicly acknowledged at this time.

A calendar scheduling program is being initiated through the Information/Visitors Center so that schools and departments planning major public events will be able to avoid setting their dates at the same time as other competing events.

Schools, departments and others wishing to determine which of several alternate dates is best should call the Information Center at x2119 in order to avoid duplicate events on the same day or the same week. In this way, parking, police, food, and janitorial services can be better utilized and the event can gain maximum publicity. Janet Norton, assistant director, News and Public Information Services, is coordinating the scheduling program.

The campus community is reminded that the Moffitt Hospital service elevator is not a passenger elevator, but instead should be used only for transporting equipment and patients requiring wheeled equipment. Priority needs are for transporting patients to and from the Post-Anesthesia Recovery Room, operating rooms and special care service units. Moffitt elevators M5 and M6 are not intended to be staff or visitor transportation elevators.

The nationally acclaimed pastor of an East Oakland black Baptist Church is the featured speaker for the annual Martin Luther King Day and Good Friday program, sponsored by the UCSF Black Caucus, on Friday, April 4, from 12 to 2 p.m., in Millberry Union Gymnasium.

J. Alfred Smith, Sr., founding president of the Bay Area Black United Fund and pastor of Allen Temple Baptist Church is nationally renowned for a powerful oratorical style, reminiscent of the late Dr. King.

Smith, past acting dean of the American Baptist Seminary of the West in Berkeley and professor of parish ministry will translate King's dream of a society with equal opportunity for all into attainable goals for the 1980's. He has authored or co-authored seven books, including *Models of Metropolitan Ministry* and *The Church in Bold Mission.*

The program will also feature Everybody's Dance Studio of Oakland performing a "Suite for Martin Luther King," and gospel singing by the New Covenant Singers of Oakland and Dolores Cannon of the UCSF Department of Pharmacology.

Two major performances, supported in part by the National Endowment for the Arts and the California Arts Council, will be presented by the Committee for Arts and Lectures (CAL) at the Lone Mountain Auditorium, University of San Francisco, 2800 Turk Boulevard. UCSF's CAL and USF's Programming Committee have joined in a co-sponsorship venture in order to provide both campuses with these exciting events.

The first presentation will be the critically acclaimed Sausalito-based theater company, Snake Theater, performing their latest play, "Ride Hard/Die Fast," on Friday and Saturday, March 14 and 15 at 8 and 10 p.m.

HARRY, a modern dance company from New York, will perform on Friday and Saturday, April 18 and 19 at 8 p.m. HARRY is directed by Senta Driver, a leading member of the Paul Taylor Dance Company for more than six years. Tickets are $3 for UCSF and USF students and Millberry Union members, and $5 general. For further information on both performances call x2019.

Conferences on psychotherapy with Latinos are being held at SFGH every third Thursday of the month. On March 20, the lecture will be "A Case of Psychotic Depression in a Central American Mother: Suicide and the S.F. Housing Authority." It will be held in Rm. 7E12, from 12:30 to 1:30 p.m.

The conferences, hosted by the social and community psychiatry programs at UCSF and SFGH, are run by the Bay Area Spanish Speaking Therapists Association. For further information contact Ricardo Muñoz, psychologist and assistant professor, Psychiatry, 821-5075.

Due to the success of the Intensive Care Nursery's Parent Support Group, ongoing regional workshops are being planned in San Francisco, Marin, Oakland, and the Upper Penninsula. Nancy McCabe, coordinator of the Parent Support Group, and the ICN staff match parents who have had sick or premature babies in the ICN with new parents wanting emotional support.

The workshops, to be held in the homes of participating parents, will include both parent discussions and practical suggestions from a developmental psychologist and a public health nurse with extensive experience in the Moffitt ICN. Through this new program, neighboring parents will be able to continue to share helpful information on what to expect as their children develop and to learn from each other about community resources that can help those with continuing problems.

The FDA now has a toll free hotline, 800-638-6725. This service is for health professionals to report problems with drugs and medical devices, especially relating to product mislabeling, incomplete or confusing instructions, erroneous information, non-sterile products, and defective components.
